

Air and Surface Purifiers

ReSPR 200

Product Description

- As a part of the ReSPR HVAC range, the ReSPR 200 units are installed in smaller spaces where ventilation ducts do not exist and where there is a need to substantially reduce odours, visible smoke in the air, and microbial populations in the air and on surfaces.
- The ReSPR 200 uses NCC Technology, which consists of an ultraviolet light and a photocatalyst lens, which creates an enhanced catalytic oxidation process containing various friendly oxidants.

Application

- The ReSPR 200 units are especially suited for any small indoor space where air quality is a challenge, and where easy installation is an advantage. The product has particular application in elevators but is equally effective in smaller spaces where odours, microbial burden, and pollution present a problem - such as in nursing homes, business offices, data centres, hotel rooms and lobbies, elevators, residential homes, airbnb apartments and residences.
- Airandé's customers have also installed ReSPR 200 units in ambulances and in limousines.

Attributes

- The ReSPR 200 is easy to install by a licensed professional.
- Zero ozone.
- No fan, no moving parts.
- Low maintenance with replacement of the NCC Cell every 18-months to 2 years dependent on the operating environment.
- Low level cleaning required.

Benefits

- Up to 99.999% kill rate of pathogens on surfaces
- Effective against bacteria, viruses, and mould
- No ozone
- Effective against odours and VOCs
- Safe, discreet and silent

Product Options

- ReSPR 200

Specifications

- Colour: Grey
- Dimensions: (L) 28.4cm x (W) 5.7cm x (D) 3.2cm
- Weight: 0.5kg
- Coverage: up to 25m²
- Electrical: 120/220 VAC, 50-60Hz; 12VDC; 5 W

Packaging

- # of pieces per Box dependent on unit size and capacity

Product Number

- AIR_RPR-12-262

Manufacturing Partner

ReSPR Technologies - USA and Spain
