

Air and Surface Purifiers

ReSPR FLEX

Product Description

- The FLEX uses a productive combination of ionization, UV light, hydrogen based friendly oxidisers, and low level ozone to diminish and prevent unwanted smells, bacteria and other pathogens, mold, and VOCs in populated indoor areas.
- Flex is our best-selling equipment for its versatility and effectiveness.
- By means of adjustments in the equipment and by remote control, you can regulate the purification and ventilation power in this equipment.
- The FLEX is now available with an optional HEPA filter.

Application

- The FLEX is state-of-the-art air and surface purifier ideal for efficient use in high traffic settings.
- The convenience of a portable unit requiring no complex installation combined with the effective technology of the FLEX makes this machine the ultimate tool in the effort to increase ventilation and to reduce odours, smoke, and microorganisms in locations such as schools, airports, restaurants, stores, and other commercial sites.

Attributes

- The ReSPR FLEX is suited for any indoor area where people live, air pollution is a challenge, and where increased ventilation is required.
- The FLEX requires no installation and its settings are operated by remote control. Low maintenance required with washable filters and replacement Cell every 2 years.
- Safe, discreet and silent

Benefits

- Up to 99.999% kill rate of pathogens on surfaces
- Effective against bacteria, pathogens, and mould
- Effective against odours and VOCs
- Safe, discreet and silent
