The Airandé Approach to Disinfection

Science

Environment

Humanity

The Airandé system brings together two complimentary technologies:

Hydrogen Peroxide H_2O_2 and Photocatalysis.

About H_2O_2

- A full spectrum of disinfection activity
- Efficient
- Odourless
- Eco-friendly and biodegradable
- No residue

About Photocatalysis

Our Technology:

- Five nature-based technologies
- Two types of ionisation to reduce particles
- UV + catalyst = oxygen and hydrogen based oxidisers to reduce microbial contaminants
- Low level ozone = odour reduction

The Airandé Product Range

Nebulizers

Disinfectant
Solutions

Wipes

Air
Purifiers

A global team of experts in disinfection have come together to solve the rising problem of infection and contamination in public transportation.

airande.global

Public Transportation – Bacterial & Viral Contamination

Some Airborne Contaminations

- Tuberculosis
- SARS
- Measles
- Upper Respiratory Infections
- Influenza

Some Surface Contaminations

- Staphylococci (MRSA, MSSA)
- Norovirus
- Gastroenteritis
- E-coli

3 Steps to Using the Airandé Disinfection System in Public Transport

Step 1

Manual Cleaning

Airandé H₂O₂ Solution 3 + Airandé H₂O₂ Wipes

Step 2

Nebulizer

Airandé Nebula DF-1, Aridus DF-2, Hygien'Air

Step 3

Photocatalysis

Airandé ReSPR Air Purifiers

Airandé Disinfection System

- Eliminates up to 99.9% microorganisms (bacteria-fungi-viruses-spores-molds)
- Safe to use around people.

Airandé Disinfection System

- Highly efficient
- Fast acting
- Cost-effective
- Easy to install and maintain

airande.global

Airandé Disinfection System

- Chemical free
- Eco Friendly Solution
- Odourless
